

Bringing your guns to Italy for the “SASS EEOT 2008“ :

To enter Italy with your guns, European competitors must have local ownership documents and a European Weapons Pass. When you arrive in Italy with your guns, you must declare these guns to Italian Customs Officials at the airport (if you are flying in), using the written invitation to the EEOT as your credentials. (Folk's traveling by car/caravan etc. need only declare guns if subjected to a random check by customs officials when crossing a border in Europe). Then you need to travel to your hotel or other accommodation that you will be staying at. Once you reach this destination you must visit the local police station and declare your guns there, and the reason that you have them with you, one more time. Again, you have the written invitation to EEOT in hand for this purpose. If you are camping at the Shooting Range please contact us upon arrival and we will assist you there. If you need to pass through Austria with your Caravan: remember that pumpaction shotguns are forbidden. If you need to pass through Switzerland, remember that this nation is not in Europe and your European Weapons Pass is not valid. You will need to fill up different exportation form: you can find all the data necessary in our web site. Choose your street in the best way: if you will be stopped at the Customs Board, no one will be able to help you to pass if you are doing something wrong.

First thing to do: Please register for the EEOT, and we will help you to take it from there!!
